CalorieCoin : Test Plan

Introduction
Thank you for agreeing to try CalorieCoin. CalorieCoin is an application which tracks the outcomes of your exercise routine. CalorieCoin then makes this information available to you, as well as an overall fitness score in the form of "CalorieCoin" available to the fiends that you would like to share your progress with. Your coins are money in the bank, and you can choose to do with them as you please : you can save them, donate them to a charity, or you can contribute them to a friend in need.

Please note that an audio and video recording of this test session will be recorded. Do I have you consent to record this session?

Participants
The participant pool will consist of at least 5 college students. Students will be given an iPhone with the prototype on it while on campus or in surrounding areas(rather than in a lab) to create a more natural environment. Recruits will most likely be classmates and friends, so that I can get a mix of majors and backgrounds.

Task 1 : Find a friend who is most in need of help and donate some of your CalorieCoins.

Steps :

• P1 : Access the friends section
• P2 : Select a friend in "need"
• P3 : Press the donate button
• P4 : Select an amount to donate
• P5 : View the result

Step Success

	P1	P2	P3	P4	P5
Participant 1					
Participant 2					
Participant 3					
Participant 4					

Total Time on Task

	Time(in seconds)
Participant 1	
Participant 2	
Participant 3	
Participant 4	

Questions :

How did you determine which friend needed the most "help"?

Did you feel this donation was helpful to your friend?

Would you donate more CalorieCoins to a friend in the future, or would you choose to save them?

How many CalorieCoins did you donate to your friend?
